Charlie –

The attached Word document provides the full list of citations for papers reviewed and included in the summary table. As we discussed, due to copyright issues, we are not able to provide copies of the articles themselves. However, I've included weblinks for all citations and there are several for which full articles can be downloaded.

I've updated the summary table of meconium concentrations to removed any colored text. As requested, I've also added a "Draft, Confidential" watermark to all pages of the PDF. Recall there are two sets of the figures – one based on a logscale and the other set based on a linear scale – but both are presenting the same datasets. Note: Since yesterday's version, I obtained one additional article (Peng et al. 2015; see attached) that provides control data for arsenic and lead. The data from this study are shown in the table and figures.

Please let me know if there is any additional information you need.

If I don't talk to you before then, have a wonderful Christmas holiday!
Lynn
